

Moneeb Almubarak

SOFTWARE ENGINEER | FULL-STACK DEVELOPER

Riyadh ,SA| +966597669464 /+966539886346| moneeb.mubarak@gmail.com

Professional Summary

Innovative Software Engineer with a strong background in Electronics Engineering and a minor in Computer Science. Specialized in full-stack development using Laravel and PHP, with proven experience in building AI-powered assistants and real-time messaging systems. Adept at leveraging Python and C# for complex simulations and XR-based tools.

Technical Skills

- Languages: Python, C++, C#, PHP, JavaScript, jQuery.
- Frameworks & Web: Laravel, TailwindCSS, MySQL.
- Specialized Tech: AI Integration, Google Maps API, Unity (XR Development).
- Tools: Visual Studio, Figma, Git, MATLAB.

Experience

Full House Platform | Laravel Developer 2024-2025

- **Developed** an AI-powered customer support assistant to automate query handling and ticket routing.
- **Built** a real-time, role-based messaging system featuring file sharing and chat history.
- **Optimized** and debugged payment systems to enhance transaction reliability and handling.
- **Implemented** a guest project submission flow with session-based data retention and recovery.

Green Line | Supply Chain Analysis Intern 2024-2025

- **Conducted** data-driven analysis of fleet operations for 120+ trucks to identify inefficiencies in fuel usage and trip planning.
- **Proposed** technical solutions to reduce empty trips and improve overall logistics efficiency.

Technical Projects

XR-Based Network Monitoring Tool | Project Engineer

- **Combined** Python and C programming within the Unity engine to build an interactive VR experience using Meta Quest 3.
- **Enabled** real-time network monitoring and immersive hands-on troubleshooting in a virtual environment.

Digital Twin for Network Performance | Project Engineer

- **Designed** a digital twin framework using predictive analytics to simulate and monitor network environments accurately.

Solar Tracking System | Project Engineer

- **Integrated** fuzzy logic control and optimized tracking algorithms using MATLAB to improve energy efficiency.

Education

Sudan International University

2023

Major: Engineering | Minor: Electronics Engineering.

Minor in Computer Science

Relevant Coursework: **Basic Robotics & AI, Cyber security (Coursera), PCB Design**

Skills & abilities

- Management
- Problem solving
- Communication
- Leadership
- Organizer
- Team work worker
- Critical thinking
- Fluent English Level
- Creativity
