

Moneeb Almubarak

Software Engineer | Full-Stack Developer

Riyadh, Saudi Arabia | moneeb.mubarak@gmail.com | +966597669464 | +966539886346

Professional Summary

Software Engineer with a background in Electronics Engineering and a minor in Computer Science. Experience includes full-stack development using Laravel and PHP, AI-powered assistants, real-time messaging systems, payment systems, Python, C#, Unity, XR development, MATLAB, and network monitoring.

Technical Skills

- Languages: Python, C++, C#, PHP, JavaScript, jQuery
- Frameworks / Web: Laravel, TailwindCSS, MySQL
- Specialized: AI Integration, Google Maps API, Unity, XR Development
- Tools: Visual Studio, Figma, Git, MATLAB

Experience

Full House Platform - Laravel Developer (2024-2025)

- Developed an AI-powered customer support assistant to automate query handling and ticket routing.
- Built a real-time, role-based messaging system with file sharing and chat history.
- Optimized and debugged payment systems.
- Implemented a guest project submission flow with session-based data retention and recovery.

Green Line - Supply Chain Analysis Intern (2024-2025)

- Conducted data-driven analysis of fleet operations for 120+ trucks.
- Identified inefficiencies in fuel usage and trip planning.
- Proposed technical solutions to reduce empty trips and improve logistics efficiency.

Featured Projects

Exemplar Center - Learning Management Platform

An online learning platform built from scratch, combining live instructor-led classes with self-paced courses. Website: <https://exemplarcenter.com>

Full House - Full-Stack Platform

A full-stack platform built from scratch for managing projects and connecting users with services across the construction and design workflow. Website: <https://fullhouse.sa>

XR-Based Network Monitoring Tool - XR / Network Monitoring

An interactive VR network monitoring experience built with Python and C# within Unity and designed for Meta Quest 3.

Digital Twin for Network Performance - Digital Twin

A digital twin framework designed to simulate and monitor network environments using predictive analytics.

Solar Tracking System - Engineering / MATLAB

A solar tracking system using fuzzy logic control and optimized tracking algorithms in MATLAB to improve energy efficiency.

Mobile Applications

- BW Scores - Google Play
- Lazada - Google Play
- Gulpes - Google Play
- Mandoubak - App Store
- PromoteMyProfile - App Store
- OrganAise - Google Play

- WellHeal - App Store
- Housie Mania - Google Play
